

## Andrew J. Crowson, D.D.S.

1920 North Main, Belton, Texas 76513

(254) 939-1868

To our patients, friends, and family, given the current global awareness around staying healthy, we'd love for you to know that at Dr. Andrew Crowson and Dr. Amalie Vance's Office, we're ahead of the curve on the battle against germs.

Patient safety and well-being is at the core of who we are at our office. With growing concerns of the Coronavirus (COVID-19), we are committed to maintaining our high level of sanitation at all locations.

Our office currently uses CDC approved products to disinfect the office multiple times daily. We also provide sanitation options, such as hand sanitizer, for you and everyone in our office to use before and after every appointment.

Our universal infection precautions for infection control have been in use for many years and will protect against Coronavirus.

If and when additional requirements are recommended by the Centers for Disease Control and Prevention, those will be implemented.

In order to maintain a healthy environment for everyone who walks through our door at our office, we will:

- Increase the frequency of deep cleans of our office and all points of contact, such as door handles, bathrooms, chairs, etc.
- Stock hand sanitizers at the front desk.
- As always, our employees will continue to frequently wash their hands with soap and hot water.
- Continue our universal infection control measures before, during and after appointments.

To help keep all of our families and patients at our office safe, we remind you to please:

- Keep your and others' health a priority and stay home if you or your child are feeling sick.
- If running a fever or coughing, please reschedule your appointment.
- Wash hands for at least 20 seconds with soap and warm water before and after and use provided hand sanitizer.
- Cover your mouth and nose with a tissue or the inside of your elbow when you cough or sneeze.

While we will continue to monitor the situation and make updates as recommended. We sincerely thank you for working with us to keep everyone safe.

Drs. Crowson and Vance and Team.
